EDUCATION

DigiPen Institute of Technology | *Daegu, Korea & Redmond, WA, USA*

B.S. in Computer Science | **GPA: 3.0**

2022 - Present

Relevant Courses: Computer Graphics, C/C++ Programming, Real-Time Interactive Simulation, Game Project Courses, Debugging, Software Development Fundamentals

TECHNICAL SKILLS

Programming Languages: C, C++, HTML, CSS, JavaScript

Graphics / Development Tools: OpenGL, WebGL, SDL2, Git/GitHub, Visual Studio, VS Code

Game Development: Gameplay systems, player movement, collision, UI behavior, gameplay logic, debugging

Interpersonal Skills: QA testing, playtesting, bug reporting, team communication, problem solving, adaptability

PROJECT EXPERIENCE

ASTAR Team | **Gameplay Programmer / QA Contributor** | **City, State**

2025 - Present

- Tested gameplay systems, reproduced bugs, and communicated issues clearly to support team iteration.
- Evaluated health, damage, recovery timing, and player feedback systems to improve balance and playability.
- QA feedback during team reviews to help identify player-facing issues before playtesting.

DigiPen Institute of Technology | **QA** | **Gameplay Programmer**

SEPTEMBER /2025

-December/2025

- Fixed random path generation bugs and implemented the final random map generation algorithm.
- Built collision systems and developed ski movement behavior that slows the player based on horizontal movement speed.
- Implemented collision feedback with trees and experimented with shadow techniques to support the game's visual direction.

PROJECTS

DIESKIE | **QA** | **Gameplay Programmer**

SEPTEMBER/2025

- Developed gameplay features for a first-person skiing game focused on movement, collision, and player feedback.
- Collaborated with a team of x and developed a ...

LEADERSHIP EXPERIENCE

DigiPen Institute of Technology | **Team Collaboration and Review** | **Daegu korea**

- Communicated QA results and gameplay observations to teammates during development.
- Helped review gameplay behavior and prioritize issues that affected the player experience.
- Supported team decisions by explaining bugs, balance problems, and player-facing feedback in clear terms.
